

LEGAL CONNECT PLATFORM – STAGE 1 FULL TIMELINE

No.	Task	Sub-Task	Notes / Tooling Used	Days	Hours
1	Project Setup	Initialize Git repo, branch structure	GitHub / GitLab	0.5	4
		Setup backend project with Express, MongoDB	Node.js, ES6, Mongoose	0.5	4
		Setup frontend with Vite, Tailwind, React	React 18 + Tailwind CSS	0.5	4
		Create shared .env.example, install dotenv	For both client & server	0.5	4
2	Linting & Tooling	Setup ESLint + Prettier	Code formatting and lint rules	0.5	4
		Install Husky, set pre-commit hooks	Prevent bad commits	0.5	4
3	Auth System	Create user model with discriminator	Mongoose base model	1	8
		Implement bcrypt password hashing	Auth middleware	0.5	4
		Add JWT token system and route protection	Auth middleware	1	8
		Build login, logout, and register APIs	REST endpoints	1	8
4	Registration Forms	Multi-step registration with validation	React Hook Form + Zod	2	16
		Upload ID verification docs via Multer + Cloudinary	Aadhaar, PAN, etc.	1	8

5	Advocate Profile System	Profile model: specialization, fees, location, etc.	With ratings & reviews	1	8
		Advocate profile page UI	Ratings, reviews, location, success rate	1	8
6	Search & Filter	Backend search API	Mongoose query filters	1.5	12
		Frontend UI for filtering and results list	Cards with call to action buttons	1.5	12
7	Appointment Booking	Create calendar model & endpoints	Date-time slots, availability	1.5	12
		Integrate calendar view in frontend	Use FullCalendar or similar	1.5	12
8	Messaging System	Setup WebSocket / Socket.IO backend	Real-time messaging	1	8
		Build chat UI (React)	With typing and delivery indicators	2	16
9	Case Management	Case schema with status, notes, participants	Client ↔ Advocate	1	8
		UI to manage and track case timeline	Timeline or Kanban-style	1	8
10	Document Uploads	Upload endpoint and Cloudinary integration	Secure file handling	0.5	4
		UI for document manager	View, download, delete	1	8
11	Intern Dashboard	Profile model: education, resume, interests	Intern-specific fields	1	8
		Internship application & listing UI	Apply/track status	1	8

12	Rating & Review System	Add review model, API routes	1–5 star system + comments	0.5	4
		Integrate UI on profile & post-booking	Controlled access (only clients after sessions)	0.5	4
13	State & Validation	Setup TanStack Query, Zod, RHF globally	Server state management	1	8
		Form validation (frontend + backend)	React Hook Form + express-validator	1	8
14	Security & Compliance	Implement Helmet, rate-limiting, HTTPS, validation	CORS, secure cookies	1	8
		Bar Council ID validation logic	Placeholder for actual API	0.5	4
15	Testing & QA	Manual testing of key flows	Chrome DevTools, Postman	1	8
		Unit tests for auth, profile, booking APIs	Jest or Mocha	1	8
16	Deployment	Dockerize backend and frontend	Optional: Railway, Render, AWS ECS	1	8
		Configure CI/CD (GitHub Actions)	Lint, build, deploy	0.5	4
		Provision MongoDB Atlas or managed DB	Secure DB URI	0.5	4
		Final smoke test on production	Booking, messaging, file upload	1	8

Scope for Stage 2 – Feature Expansion & Business Layer

Stage 2 focuses on **enhanced features, monetization, polish,** and **scaling**, such as:

1. Subscription & Payments Integration
2. Advanced Analytics for Advocates
3. Admin Dashboard & Moderation Tools
4. Multi-modal Communication (Video/Voice Chat)
5. Bar Council ID Real-Time Verification Integration
6. Advanced Search (Auto Suggest, AI Placeholder)
7. User Settings (Language, Notification Preferences)
8. Progressive Web App (PWA) Enhancements
9. Legal Resource Library
10. Internship Certificate Generation
11. Multi-role Support for Legal Firms
12. Platform SEO Optimization & Marketing Hooks

No.	Task	Sub-Task	Notes / Tooling Used	Days	Hours
1	Payments & Monetization	Integrate Razorpay/Stripe for consultations	Razorpay for INR support	1	8
		Add transaction history to user dashboards	Track paid bookings	0.5	4
		Develop subscription plan system	For premium listings	1	8
		Create invoice/email receipt system	Post-payment event	0.5	4

2	Video/Voice Communication	Integrate Twilio/Agora SDK for video chat	SDK for room creation and streaming	1.5	12
		UI for video consultation interface	Join/Leave buttons, timer, mute	1.5	12
		Implement call scheduling + reminders	Email & in-app notification	0.5	4
3	Admin Panel	Build dashboard with user metrics	Clients, Advocates, Interns count, reports	1	8
		Add user ban/block/report functionality	With reason + soft-delete	1	8
		View & moderate documents, reviews	Flag inappropriate content	1	8
4	Advanced Analytics	Visual dashboard for advocates (revenue trends, popular services)	Charts with Recharts/D3	1	8
		Add metrics: client conversion, average booking fee	Aggregate calculations	0.5	4
5	Bar Council ID API	Integrate with live Bar Council database (if public/partnered)	Or create manual review workflow	1	8
		Build admin review queue for manual approvals	With status change actions	0.5	4
6	Legal Resource Library	Add CMS-style content (articles, legal templates, Q&A)	Markdown editor or WYSIWYG	1	8

		Role-based access to content posting (advocates/admins)	Auth check, moderation queue	0.5	4
7	Internship Certification	Generate auto-filled certificate PDFs for interns	Using PDF-lib / Puppeteer	1	8
		Add download option in dashboard	Download from document store	0.5	4
8	User Preferences	Add language toggle (EN/HIN/REG)	Store in user profile + localize content	1	8
		Enable notification settings per channel	Email, SMS, Push toggle	0.5	4
9	Multi-role Support	Allow law firms to create team accounts	Add advocate to a firm/org	1	8
		Switch between personal and team dashboard	Context-switching logic	1	8
10	SEO & Growth Enhancements	Generate public advocate profiles with meta tags	For Google indexing	0.5	4
		Add sitemap, robots.txt, SEO schema	Auto-generated on deploy	0.5	4
		Integrate Google Analytics + Pixel	Track user flows	0.5	4
11	Progressive Web App (PWA)	Enable service workers, manifest.json	Vite + Workbox	1	8
		Add offline page fallback	Cache key UI assets	0.5	4
		Test for Lighthouse PWA compliance	Chrome DevTools audit	0.5	4
12	QA & Testing Phase	Regression test: payments, calls, subscriptions	Manual + API test	1	8

		Cross-browser and device testing	iOS, Android, Desktop	1	8
		Prepare test plan + bug backlog	Use Notion / Linear / GitHub Issues	1	8
13	Deployment	Create new staging env or extend CI/CD	Preview branch builds	1	8
		Migrate DB schema + run sanity tests	Versioned migrations	0.5	4
		Announce feature update to users	Email or toast banners	0.5	4
